

NANDHAN S S

SOFTWARE DEVELOPER | FRONTEND DEVELOPER | CYBERSECURITY | AI & PROMPT ENGINEERING

Coimbatore, Tamil Nadu | nandhan2307@gmail.com | [LinkedIn](#) | [GitHub](#)

PRINCIPLE: Thinking Beyond SYNTAX

PROFESSIONAL SUMMARY

Computer Science Engineering undergraduate with hands-on exposure to software development, frontend technologies, AI-assisted development, prompt engineering, cybersecurity, cloud fundamentals, UI/UX, and creative production. Completed a cybersecurity internship involving network traffic analysis, OSINT, reconnaissance, vulnerability assessment, email-security validation, virtualization, and secure web-server deployment. Built project experience through **NandConnects**, a college hub website, and **Paalam**, a real-time medicine stock visibility solution for rural PHC clusters. Strong interest in building practical, secure, user-focused digital solutions.

EDUCATION

B.E. Computer Science & Engineering | PPG Institute of Technology, Coimbatore

Expected Graduation: 2028 | CGPA: 7.8 / 10

EXPERIENCE

Cybersecurity Intern | Prompt Infotech, Coimbatore

1 Month | Dec 2025

- Gained hands-on experience in network security, ethical hacking fundamentals, virtualization, and secure web-server deployment through practical cybersecurity projects.
- Performed traffic analysis, OSINT, reconnaissance, vulnerability assessment, and email-security validation using industry-standard tools and techniques.
- Built practical expertise with Wireshark, Kali Linux, Packet Tracer, VirtualBox, Apache, Shodan, VirusTotal, WHOIS, and WordPress security analysis.

PROJECTS

NandConnects | College Hub Website

- Developed a college-focused web platform concept designed to centralize campus information and student-facing resources in one digital hub.

Paalam | Real-Time Medicine Stock Visibility Solution

- Designed a real-time medicine stock visibility solution for rural PHC clusters to address gaps in medicine availability and help ensure the right medicine reaches the right hands at the right time.
- Represented PPG Institute of Technology as Team The Conquerors at Tech for Good 2026: GDG Coimbatore Build with AI 36-hour Hackathon under the Good Health & Well-being track with Paalam.

TECHNICAL SKILLS

Programming: Python, C, C++

Web & Application Development: HTML, CSS, Flutter, MongoDB

AI & Prompt Engineering: ChatGPT, Claude, Gemini, GitHub Copilot, Perplexity, Higgsfield AI, Prompt Engineering

Cybersecurity: Cybersecurity Fundamentals, Wireshark, Kali Linux, Packet Tracer, VirtualBox, Apache, Shodan, VirusTotal, WHOIS, WordPress Security

Cloud, Dev Tools & Platforms: Git, GitHub, VS Code, Vercel, Supabase, Firebase, AWS

Design & Creative Technology: Figma, Canva, Adobe Photoshop, Adobe Illustrator, Adobe Premiere Pro, Framer, Blender, Motion Graphics

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

Anthropic — Claude Code in Action | Jun 2026

Anthropic — Introduction to Claude Cowork | Jun 2026

Accenture / FutureLearn — User Experience

EY & Microsoft — AI Skills Passport

ACHIEVEMENTS & STRENGTHS

- **GDG Coimbatore — Build with AI [36Hrs Hackathon]:** Represented PPG Institute of Technology as Team The Conquerors at Tech for Good 2026 with Paalam under the Good Health & Well-being track.
- **AI & Developer Learning:** Completed Anthropic programs covering Claude fundamentals, Claude Code, subagents, debugging, AI collaboration, workflow optimization, and practical AI engineering.
- **Professional strengths:** Problem solving, prompt engineering, AI-assisted development, security mindset, UI/UX thinking, visual storytelling, rapid prototyping, collaboration, and continuous learning.
